Thank you, Mindy! I'll incorporate your comments into the draft.

Have a good day!
Irene

Irene,

Our edits/comments on the final draft are few, so I will just list them here:

1. John Wirts has a new extension: 43871
2. I have a new extension: 43885
3. Section 1.1: In the first sentence Christopher Knight added a clarification for ionic toxicity that says, "(elevated dissolved solids in the water column)." The fourth sentence of the same paragraph says, "Ionic toxicity results from the presence of excessive amounts of dissolved solids (e.g., mineral salts) in a waterbody and can....." I would like to see the two phrases be consistent or for the first clarification to be omitted in light of further explanation later in the paragraph.

Thank you for giving us an opportunity to review again. Let us know if you need anything else to finalize the QAPP.

Hi Mindy and John,

I'm just following up to see if you have any additional comments on the QAPP. Could you please let me know by Friday?

Thanks so much and hope you're having a good Monday!

Irene

Hi Mindy and John,

Please find attached the revised version of the Modeling QAPP for the WV Ionic Toxicity TMDL project. There's a clean copy and one containing comments/responses with track changes. Could you please take a look and let us know if you have any additional comments or edits?

Thanks so much,
Irene
